Investment Strategy

The 3EDGE TargetRisk Moderate Fund (the "Moderate Fund") is a globally diversified, multi-asset portfolio, invested across a wide variety of asset classes and geographies. Investment exposure is achieved primarily through the use of index exchange traded funds (ETFs). The investment objective is to generate long-term capital appreciation and attractive risk-adjusted returns over full market cycles. The Moderate Fund may be appropriate for investors who are more focused on longer-term capital appreciation and have a time horizon of more than 3 years, at least for this component of an investor's overall liquid assets.

Investment Philosophy

3EDGE focuses exclusively on top down, portfolio allocation to create globally diversified portfolios. 3EDGE's goal is to generate attractive, risk-adjusted returns over full market cycles by making investments in undervalued asset classes that are poised to begin a period of market outperformance due to identified catalysts. 3EDGE believes that markets tend to be relatively micro-efficient and macro-inefficient. This means that oftentimes market indices tend to outperform individual security selection due to wide dissemination of information about publicly traded securities. However, when investing across asset classes and geographies at the index level there is far less information available and herein lies the opportunity. Since asset classes at the index level are part of a complex, non-linear, dynamic system they tend to be more difficult to understand and therefore they are generally more apt to be mispriced than individual securities.
